Sample **D8 Sour Space Candy**

Sample ID	SD230207-131 (61313)	Matrix	Flower (Inhalable Cannabis Good)
Tested for	Cultivar Oregon		
Sampled	-	Received	Feb 07, 2023
Analyses executed	CAN+, MWA	Reported	Feb 09, 2023

**Laboratory note:** The estimated concentration of the unknown peak in the sample is 1.82%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-d8-THC or d9-THC. At this time there are no reference standards available for (+)-d8-THC. (+)-d8-THC is a different compound from the main (-)-d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-d8-THC and d9-THC with the majority, if not all, of the concentration being (+)-d8-THC. Total d8-THC is estimated to be 23.27%.
